

# **PAPER SHREDDERS**

**... Setting the Standard for Quality,  
Performance and Dependability.**

Ameri-Shred Corp. offers innovative shredding products by continually providing standard and custom designed solutions along with new product development. From heavy duty office models to

the heaviest industrial duty, conveyor-fed, shredders, Ameri-Shred takes document destruction seriously. Applying the highest standards in engineering and manufacturing, Ameri-Shred can build

a shredder for your application. Ask an Ameri-Shred professional how you can own or lease one of the finest products in the industry.

# Ameri-Shred Corp.

*A Cut Above the Rest*

## PAPER SHREDDERS

### High Volume Paper Shredders

#### Light Duty Industrial Paper Shredders

Four conveyor-fed models designed for high volume, centralized shredding are powerful units that have A-2 tool steel cutters and a paddle-wheel crusher to crush contents prior to shredding. Standard shred width is 5/16"; others available. Frame size is 47 1/4"H x 36"W x 59"L with a 28" long infeed conveyor and optional attached output conveyors.

#### Heavy Duty Industrial Paper Shredders

Ameri-Shred also offers four conveyor-fed models of Heavy Duty Industrial Shredders. When matched with our AMS-T3 Tipper, output conveyor and baler, these shredders offer an efficient method of shredding for large volume document destruction and recycling operators. Standard shred width is 1/2" or 5/8". Frame size is 64"H x 88"W x 168"L with a 111" infeed conveyor.

#### Medium Duty Industrial Paper Shredders

All five models of medium duty, conveyor-fed shredders are similar in appearance with each successive model having more power, a larger drive chain and greater throughput. These units will realistically shred between 1 and 3 tons per hour. Optional output conveyors are available. Standard shred widths of 1/2" and 5/8". Shredder frame size is 67"H x 62"W x 112"L with a 72" infeed conveyor.

#### Magnum Series Paper Shredders

Security Recycling is the job of Ameri-Shred high capacity Magnum Industrial Shredders. Additional equipment available as system components include in-floor pit, above ground pit, hinged steel belt conveyors, Ameri-Shred's patented metering system and balers. Multi-station sorting conveyor systems with metal detection capability will further your Security efficiency.

**FOR HIGHER SECURITY, DOUBLE CUT SYSTEMS ARE AVAILABLE.**

# Office Paper Shredders

## Heavy Duty Office Paper Shredders

Four sizes are available with all-steel construction, a precision ground high carbon steel cutter, automatic reverse and whisper-quiet operation. An affordable way to dispose of confidential information. Available in 5/16" and 1/8" shred widths.

## Crosscut Paper Shredders

Select sizes are available with all-steel construction, a precision ground high carbon steel cutter, automatic reverse and whisper-quiet operation. An affordable way to dispose of confidential information. Available in several shred widths. Also available in light duty industrial models.

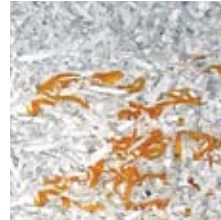

# Medi-Shred Pharmacy Shredder

The Medi-Shred pharmacy shredder is a unit that is capable of destroying all normal pharmacy waste including plastic pill bottles with sensitive patient personal information.

Before

After

# Mobile Document Destruction

## Finally an affordable mobile shredding truck!

With its 5000 lb. plus capacity, 5/16" shred width and fast loading and unloading, this truck is a great example of the ingenuity at Ameri-Shred Corp.

# Shredding System Components

## Tipplers

The most efficient way to empty carts, containers and gaylord boxes. These tipplers reduce operator fatigue and strain and increase productivity by lifting the container from floor level and releasing the contents onto the feed table of a paper shredder, a sorting conveyor or directly into a baler.

## Balers

We offer both horizontal and vertical balers. The horizontal balers are equipped with electronic eye sensors for continuous shredding and baling. Our trained, experienced personnel can supply you with the appropriate baler to match any model shredder producing bales weighing between 200 and 2000 lbs.

## Output Conveyors

Heavy duty output conveyors carry shredded material away from the shredder into a baler, compactor or other container. They are available in varying belt widths and extra high side frames. Independently powered conveyors ensure that no power is taken from the shredder.

## Paper Metering System

Our patented paper metering system allows a predetermined amount of paper into the shredder, minimizing jams while maximizing shredder throughput.

# Features

## Features found on the models AMS-300 through AMS-20000

- ▶ Wear plates to adjust the cutterhead to maintain tolerances and maintain the ability to shred a single check
- ▶ Single point lubrication
- ▶ Lift off panels for easy maintenance
- ▶ Spur gears running in an oil bath
- ▶ Extra large feed tables
- ▶ Positive Overload Protection
- ▶ Key locked low voltage electrical control system
- ▶ Warranty - 1 year with local service

# Total Customer Satisfaction

Total customer satisfaction is an ongoing commitment at Ameri-Shred. We earn your confidence through quality products and professional service that is second to none. Just a phone call away, our extremely knowledgeable technicians are ready to help with:

- ▶ **Parts**
- ▶ **Technical support**
- ▶ **General maintenance tips**
- ▶ **Equipment rebuilds**
- ▶ **System installations**
- ▶ **Same day shipping for most standard parts**
- ▶ **Lease/rental programs**

*"The machine has quadrupled our output, its been a pleasure dealing with Ameri-Shred and we are very grateful for a superior product that is backed by a superior company."*

**Tami Maynard**

Sales Manager  
Safeshred

*"I am very loyal when deciding what and from whom to purchase my products. Your service has solidified my decision to continue doing business with you."*

**Scott Overweg**

Owner  
West MI Document Shredding

*"I cannot tell you how pleased we are with your products. This system has met and exceeded our expectations. Thank you for your outstanding service."*

**Jerry Hastings**

President  
Rochester Data Storage Center, Inc.

**Ameri-Shred...Let us exceed  
your expectations today.**
