DaDeeMFG
A Camion Holdings LLC Company

SCORPION **FE**

Automated Side Loader

28 CUBIC YARD BODY SIZE (DIESEL/CNG)

USABLE CA/CT	MIN AF	WHEEL BASE	A
184-194"	88-78"	210-220"	302.0"
164-198"	104-100"	194-198" W/TAG	302.0"

31 CUBIC YARD BODY SIZE (DIESEL/CNG)

USABLE CA/CT	MIN AF	WHEEL BASE	A
189-204"	83-68"	215-230"	323.5"
164-168"	104-100"	194-198" W/TAG	323.5"

ARM PERFORMANCE

LIFT CAPACITY..... 2,000 LBs
LIFT CYCLE TIME..... 8 Seconds
LIFT REACH..... 96 Inches
WORKING RPM DIESEL..... 750-775
CNG..... 800

PACKER PERFORMANCE

COMPACTION..... Up to 1000 LBs
Per Cubic Yard
AUTO PACK CYCLE TIME..... 14-17 Seconds
at Idle

The Refuse Equipment **INNOVATORS**

SCORPION **FE**

PATENT PENDING

Self-Cleaning Full Eject Automated Side Loader

The Safest Unit Produced in the Industry Today

LOW PROFILE BODY HEIGHT

Enables roof mounted CNG Systems to be installed up to 90 DGE & maintain a "maximum" 12' 5" height dimension without the risk of overhead road hazards such as tree branches and power lines.

LARGEST HOPPER CAPACITY IN THE INDUSTRY AT 5+ CUBIC YARDS

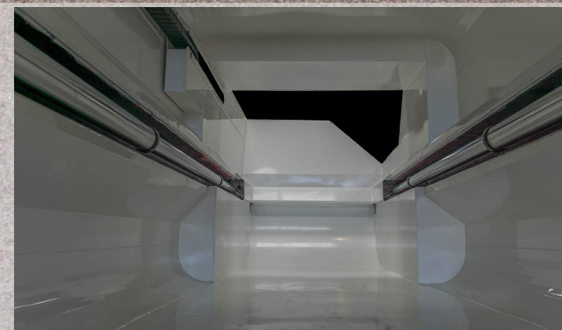

NEW MD4 OPERATING SYSTEM

The new MD4 features a 7" all touch screen monitor, and now allows operators to have proportional control for ease of operation while on route.

ALL STAINLESS STEEL HYDRAULIC TUBING

TELESCOPIC PACKING CYLINDERS

The telescopic packing cylinders mounted inside the body channel not only keep material from coming in contact with the cylinders but have more packing force than traditional criss-crossed cylinders.

PRODUCTIVE PACKING MECHANISM

With competitive equipment today, many full eject models use a ram style packing mechanism. With the Scorpion FE, the unit utilizes a self-cleaning slide/sweep mechanism swiftly clearing away bulky materials eliminating any jamming in the hopper area.
